

Health at Dulwich Newsletter

July / August 2018

FULLY ACCREDITED

Health at Dulwich is pleased to announce that we have successfully achieved Full Accreditation. I am sure that you will notice our Accreditation Certificate which we are very proud to hang on the reception wall. Our practice team and doctors have all worked very hard to achieve full accreditation so that you can be assured we are providing you with the best possible care and service.

We are also very pleased to welcome and introduce Dr Anita Daniel who has recently joined our practice. Dr Daniel has interests in Women's Health, General Medicine, Children's Health, Ophthalmology and Preventative Health and Wellbeing; please speak with our wonderful receptionists to book an appointment with Dr Daniel.

PRACTICE EXTENSIONS

Over the next few months, you may see a number of workers in and outside around our practice building. Health at Dulwich is planning extensions to the building, which will provide for a larger waiting area and a new treatment room. We do not anticipate any disruptions to our services, and we will keep you informed of these plans.

REMINDER- IT'S FLU SEASON AGAIN

Don't forget to have your flu vaccination. Please speak to our friendly receptionists to book an appointment for your flu vaccination.

If you have any thoughts on how Health at Dulwich can improve our service and care, please feel free to complete one of our feedback forms or let one of our receptionists know so that we can continue to improve our service to you.

The Team at Health at Dulwich
